EDUCATION

Alabama State University

Bachelor of Science in Computer Science

Montgomery, Alabama, USA.

August 2024 – May 2028 (Expected)

AWARDS/HONORS: Academic Incentive Scholarship, CFA Scholar

RELEVANT COURSES: Intro to Computer Science & Python (Harvard CS50 & Khan-Academy), Advanced Web Development (Greg & Co, Makurdi), Pre-Calculus, Calculus I (In-View), Code path Intermediate Technical Interview Prep (Data Structures & Algorithms, Machine Learning and Object-Oriented Programming)

SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, Python, C, Node.js, Next.js, React.js, APIs

Software: GitHub, Firebase, Google Analytics, Microsoft Office, Visual Studio Code

EXPERIENCE

Google Cloud Career Jumpstart –Summer Cohort

June 2025 - Date

Cloud Engineering Fellow

- Gained hands-on experience with Google Cloud tools, deploying and managing cloud-native applications
- Received technical training, career coaching, and mentorship to accelerate growth in cloud and DevOps engineering

Arkansas Summer Research Institute (ASRI).

May 2025 - Date

Data Science Research Fellow

- Developing skills in Python, data visualization, and statistical analysis through daily technical workshops
- Applying machine learning techniques to real-world datasets using Pandas and Matplotlib
- Collaborating with mentors to design and present an original data science research project

HeadstarterAI

July 2024 – August 2024

Software Engineering Fellow

- Transitioned from building basic websites with HTML, CSS, and JavaScript to creating advanced applications like an inventory management tracker using **Next.js, Node.js and Vercel for hosting**
- Received rigorous interview preparation, resume reviews, and direct feedback from industry experts

PROJECTS

Pass the Plate – Codepath x Amazon Next Design Challenge

May 2025

- Developed AI feature to scan receipts and auto-fill a smart pantry with expiration tracking
- Integrated trust tools like ID verification and “Verified Giver” badges to enhance safety
- Collaborated with team to build and deploy full-stack app using React, Firebase, and Python

AdBud (https://github.com/George-MichaelKo/ASU_TECH_03142025)

March 2025

- Built AI-powered ad platform with 90%+ targeting accuracy using **Python NLP and React**
- Integrated real-time intent detection via **Flask APIs** in the 24-hour Battle of the Brains Hackathon
- Collaborated cross-functionally to deploy full-stack solution with dynamic ad bidding

Addhix (<https://hlp.chat/RefundCalculator>)

May 2024

- Created an essential tool for calculating warranties and refunds
- Streamlined warranty and refund processes, boosting efficiency by over 65%
- Built it using **HTML, CSS, JavaScript, Node.js, Google Analytics, and Firebase for hosting**

LEADERSHIP/ORGANIZATION/ACTIVITIES

ColorStack

Member

May 2025 – Date

- Participated in career workshops, mentorship, and networking to grow as a Black CS student
- Engaged with a national community to explore tech opportunities and boost representation in STEM

NSBE

Alabama State University Chapter, Member

September 2024 – Date

- Engaged with Upperclassmen and professionals to build networks and expand STEM knowledge
- Mentored peers, fostering support and community engagement among first-year students
